

NOW SFI 29.3 APPROVED!!

BD Cummins Flex Plate

For 1994-2009 Dodge Ram Diesel Trucks

1041210	Dodge 5.9L Cummins	1994-2006
1041220	Dodge 6.7L Cummins	2007½-2009

PLEASE READ ALL INSTRUCTIONS BEFORE INSTALLATION.

- 2 times thicker than stock
- Manufactured using 1045 Billet forge.
- 300% less radial run-out compared to other aftermarket flex plates
- SFI 29.3 approved for high horsepower diesel applications
- Not affected by hydrogen embrittlement which can drastically reduce strength.
- 350% better fatigue strength than aluminum
- Correct ring gear that won't damage starter.
- Fits with any size torque convertor (OEM or Aftermarket)

**** Cautionary Note ****

Please read the disclaimer before proceeding to install this unit. Do not install unit if you do not agree with the disclaimer.

Installation

1. Remove the factory flex plate and the large steel washer.
2. Install the BD Flex plate, reusing the factory steel washer. Tighten the 8 factory bolts in a criss-cross pattern, to the factory torque specifications described below.

Factory Torque Specifications

Flexplate to Crank	101 lbs-ft	Flexplate to Torque Converter	33 lbs-ft
--------------------	-------------------	-------------------------------	------------------

SFI 29.3 certifications are good for 3 years from the date of manufacture. The manufactured date can be found on the SFI sticker.
